

Benefits to Being a BNI Member:

1. Gain support from other business owners such as your self by meeting once a week and during one on ones for renewed emotional strength and support.
2. What one business owner doesn't know, the other does. BNI members help each other to optimize their business and share methods and ideas as well as referrals.
3. Membership in BNI is like having your own team of consultants and support staff. Whether you need counseling, marketing, professional photography, graphic art and web design, advertising, human resources, a company car, insurance and investment and benefit packages, business loans, printing, computer and electrical help, plumbing and building, your business has the on-going support it needs and is usually considered a top priority.
4. Membership in BNI offers you top quality referrals from other members who care about your success and offers you a context for making referrals to people you can trust in terms of quality of service and integrity.
